Why choose FRAM

FRAM Air Filters provide superior protection, for strenuous driving conditions, from idling in heavy traffic, to driving on dusty roads and towing heavy loads.

FRAM Fuel Filters serve a vital function in today's modern tight-tolerance engine fuel systems. By removing rust and dirt particles from petrol or diesel, fuel filters protect fuel pumps and injectors from rapid wear and failure.

FRAM Oil Filters are ideal for drivers who push their vehicles, whether in stop and go traffic, by towing, or driving in extreme weather conditions. FRAM Oil Filters continuously purify the oil in the vehicle, by filtering out and retaining abrasive particles, dust and combustion residue.

FRAM Cabin Air Filters allow travelers inside the vehicle to breathe cleaner air by filtering out pollen, allergens, exhaust fumes, dirt and dust that enter the vehicle through the cooling/heating ventilation. FRAM Cabin Air Filters can eliminate up to 98% of these impurities, providing a more enjoyable ride.
